The uncompromising hand prosthesis

- Waterproof according to IP68
- Heavy-duty aluminium frame for maximum load capacity
- Optional titanium frame for even higher load capacity
- Elastic base joints and springy finger elements for perfect adaptation
- Four wrist options from transcarpal to quicksnap with bendable joint
- All hand and wrist functions are optimized for bilateral users
- Silicone covers provide maximum durability, hygiene, haptic and adaptive control when gripping and holding
- Precise grip selection via gesture control
- A powerful pinch grip, enabling the gripping of objects as small as $\varnothing 1\text{mm}$
- Display and adjustment of control signals directly on the hand
- Battery charge status displayed directly on the hand
- Grip selection and locking of the prosthesis can be selected directly on the hand
- Precise sense of touch (force feedback)
- Customizable: 5 hand sizes, 25 different color combinations
